SOFT SKILLS

- Team Work
- Problem Solving
- Communication

PROJECTS

Merchanza - **ECommerce Website**

(React Js | Node Js | Express Js | Mongo DB | Tailwind CSS)

- I developed a comprehensive e-commerce platform for clothing, cosmetics, and electronics, featuring an intuitive admin panel.
- Implemented user authentication with JWT for secure login and access.
- Created responsive checkout pages tailored to each customer for a seamless purchase experience across devices.
- Built an admin section for easy addition and removal of products, ensuring efficient inventory management.
- Ensured a fully responsive design for an optimal user experience on all devices.

ToDo Application

(React Js | Node Js | Express Js | Tailwind CSS)

The Todo application allows users to manage their tasks efficiently with the following features:.
- User Login: Secure authentication system to ensure that each user can access their personal task list.
- Add Activity: Users can create and add new tasks to their to-do list, providing descriptions and deadlines if needed.
- Delete Activity: Users can remove completed or unnecessary tasks from their list, keeping their task management streamlined.

BulkMail Application

(React Js | Node Js | Express Js | Tailwind CSS)

- Upload Email List: Users can upload an Excel sheet containing the email addresses of recipients.
- Compose Message: Users write a single message that will be sent to all recipients.
- Send Bulk Email: The app processes the uploaded email addresses and dispatches the composed message to each one.
- This application streamlines the process of sending bulk emails, making it easy to reach multiple recipients with a single message.
